Software Engineer

Description:

TI-TechInterrupt is seeking a talented and motivated Software Engineer to join our growing team. In this role, you will be responsible for designing, developing, and maintaining high-quality software solutions. You will work closely with our engineering team to deliver innovative and impactful products that meet the needs of our clients.

Responsibilities:

- Design, develop, and implement software applications using Java, Python, and SQL.
- Write clean, efficient, and well-documented code.
- Collaborate with other engineers to design and implement new features.
- Troubleshoot and resolve software defects.
- Participate in code reviews and provide constructive feedback.
- Stay up-to-date with the latest technologies and trends in software development.

Skills:

- Strong proficiency in Java, Python, and SQL.
- Experience with object-oriented programming and design patterns.
- Experience with relational databases and SQL queries.
- Excellent problem-solving and analytical skills.
- Strong communication and collaboration skills.
- Ability to work independently and as part of a team.

Experience:

- 2-3 years of experience in software development.
- Experience working in an Agile development environment.
- Experience with version control systems (e.g., Git).
- Experience with cloud computing platforms (e.g., AWS, Azure) is a plus.
