Software Engineer

Description:

Join our team of innovative thinkers at TI-TechInterrupt! We're seeking a highly skilled Software Engineer to develop cutting-edge software solutions. As a key member of our engineering team, you'll design, build, and deploy scalable software applications that drive business growth.

Responsibilities:

- Design, implement, test, and maintain high-quality software applications
- Collaborate with cross-functional teams to define and deliver software projects
- Develop and maintain technical documentation and specifications
- Troubleshoot and resolve complex software issues

Skills:

- Proficient in Java programming language (strongly preferred)
- Experience with SQL databases and data modeling
- Familiarity with Python programming language (desired)

Experience:

- 2-3 years of experience in software development or a related field
- Proven track record of delivering high-quality software applications on time
- Strong understanding of software engineering principles, design patterns, and architecture
